1 A comparative evaluation of object definition techniques for large prototype systems
Jack C. Wileden, Lori A. Clarke, Alexander L. Wolf
October 1990 **ACM Transactions on Programming Languages and Systems (TOPLAS)**, Volume 12 Issue 4
Publisher: ACM Press
Full text available: pdf(2.47 MB) Additional Information: full citation, abstract, references, citings, index terms, review

Although prototyping has long been touted as a potentially valuable software engineering activity, it has never achieved widespread use by developers of large-scale, production software. This is probably due in part to an incompatibility between the languages and tools traditionally available for prototyping (e.g., LISP or Smalltalk) and the needs of large-scale-software developers, who must construct and experiment with large prototypes. The recent surge of interest in app ...

2 Exception-based information flow control in object-oriented systems
Elisa Bertino, Sabrina De Capitani Di Vimercati, Elena Ferrari, Pierangela Samarati
November 1998 **ACM Transactions on Information and System Security (TISSEC)**, Volume 1 Issue 1
Publisher: ACM Press
Full text available: pdf(457.22 KB) Additional Information: full citation, abstract, references, citings, index terms, review

We present an approach to control information flow in object-oriented systems. The decision of whether an information flow is permitted or denied depends on both the authorizations specified on the objects and the process by which information is obtained and transmitted. Depending on the specific computations, a process accessing sensitive information could still be allowed to release information to users who are not allowed to directly access it. Exceptions to the permissions and restricti ...
